the authors contend that japanese firms are successful because they are innovative and not merely masters of imitation as some think and because they create new knowledge and use it to produce successful products and technologies illustrations

some of the best vision scientists in the world in their respective fields have contributed to chapters in this book they have expertise in a wide variety of fields including bioengineering basic and clinical visual science medicine neurophysiology optometry and psychology their combined efforts have resulted in a high quality book that covers modeling and quantitative analysis of optical neurosensory oculomotor perceptual and clinical systems it includes only those techniques and models that have such fundamentally strong physiological control system and perceptual bases that they will serve as foundations for models and analysis techniques in the future the book is aimed first towards seniors and beginning graduate students in biomedical engineering neurophysiology optometry and psychology who will gain a broad understanding of quantitative analysis of the visual system in addition it has sufficient depth in each area to be useful as an updated reference and tutorial for graduate and post doctoral students as well as general vision scientists

the world s deserts are sufficiently large that in theory covering a fraction of their landmass with pv systems could generate many times the current primary global energy supply in three parts this study details the background and concept of vls pv maps out a development path towards the realization of vls pv systems and provides firm recommendations to achieve long term targets this represents the first study to provide a concrete set of answers to the questions that must be addressed in order to secure and exploit the potential for vls pv technology and its global benefits

this volume provides an authoritative synthesis of a dynamic influential area of psychological research leading investigators address all aspects of dual process theories their core assumptions conceptual foundations and applications to a wide range of social phenomena in 38 chapters the volume addresses the pivotal role of automatic and controlled processes in attitudes and evaluation social perception thinking and reasoning self regulation and the interplay of affect cognition and motivation current empirical and methodological developments are described critiques of the duality approach are explored and important questions for future research identified

the fully updated fifth edition covers the essential information required to become a neurobiologically empowered psychopharmacologist

perception and cognition are tightly related as our primary mode of contact with the world perception is the informational and causal foundation of our cognitive processes it is fundamental to our empirical thinking believing and

action planning traditional accounts of the mind consider perception and cognition to be distinct yet highly interrelated systems much interdisciplinary empirical and theoretical work from cognitive scientists and philosophers has attempted to elucidate the complex relations holding among these systems suggesting the existence not only of influences of perception on cognition but also vice versa however many questions are left unanswered given that perception is a guide to our thinking about and acting upon the world appropriately the two systems must be able to talk to one another information carried by perception must be of a form adequate to be taken in by our various cognitive systems the question arises what kinds of structural similarities must hold between perceptual and cognitive representations for such communication to be possible and how exactly do perceptual and cognitive representations interact some researchers have argued that the links between perception and cognition are so tight as to instill doubt as to the significance of the distinction between the two systems in the first place yet others insist that perception and cognition remain distinct the aim of this research topic is to deepen our understanding of the kinds of interaction among perception and cognition and of the nature of the representational structures that would enable such interaction provided by publisher

reviews the literatures on sustainable communities this volume explores and analyzes the policies practices and strategies related to community involvement and how this shapes local environmental contexts it debates and shares experiences generated through the various empirical studies
